

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. REPORT OF THE SECRETARY OF STATE.

STATE OF ILLINOIS, EXECUTIVE DEPARTMENT,
OFFICE OF SECRETARY OF STATE,
SPRINGFIELD, October 2d, 1876.

To His Excellency, JOHN L. BEVERIDGE, Governor :

SIR : I have the honor herewith to submit my second biennial report in compliance with the law defining the duties of Secretary of State.

The 29th General Assembly of the State, by the passage of an act in relation to the fiscal year, changed the time of its commencement to the first of October and also provided that the reports of the various State officers should be made on or before November 1, 1876, and biennially thereafter.

In my first biennial report to your Excellency I gave a detailed statement of the work and duties of this office and such other matters as in my judgment might be of public interest, which embraced all information required by the Statute law up to and including the 30th day of November, 1874, which by the then existing law was the close of the fiscal year. This, my second biennial report, therefore (in compliance with the act changing the date of the commencement of the fiscal year), will only embrace the result of the work and matters upon which I am required to report from Nov. 30, 1874, the close of my last report, up to and including the 30th day of September, 1876, (as now provided by law) a term of one year and ten months.

OCCUPANCY OF THE NEW STATE HOUSE.

In my last report I gave to your Excellency the reasons in full for the delay in the occupation of the new state house by the various State offices. The same causes that operated as a hindrance to the removal at that time continued until July, 1875, when I took informal possession of a portion of the new state house and commenced the removal of the books, papers, documents and State archives, (an immense accumulation of years) to the new building. This proved a tedious and laborious work, and it was not until the 10th day of January, 1876, that I felt it was proper for me to transfer the clerical force from the old building to the new and commodious quarters now occupied; but the building was not sufficiently advanced towards completion to permit the occupancy of their various offices by all the officers of the State until the spring of 1876.

The Commissioners in charge of the erection of the new state house in their report to your Excellency, will no doubt made a full, complete, and detailed statement of the result of the years of faithful, zealous and earnest supervision and the construction of such a magnificent building, as the new state house will prove to be ; grand in all its details and most admirably adapted for the purposes for which it is intended. The Secretary of State has assumed the custody and control of all that portion of the building which is finished and occupied, and I will only suggest in substance what I said in my last report, that when the Commissioners have finally finished their work and turned the building over to the State, by law the Secretary of State has the entire custody thereof and is responsible for its care and the safe keeping of the books, papers and property therein. The duties thus imposed upon the Secretary of State in addition to his other duties are onerous and the responsibility very great, and sufficient appropriations and every facility should be given that officer to enable him properly to care for and keep in repair such a magnificent structure as the new state house will be when completed. A large number of janitors, porters and messengers will necessarily be employed, especially during the sessions of the General Assembly, and the necessary appropriations will be required to meet this expense.

REMOVAL OF THE STATE ARCHIVES.

The removal of the State archives from the old to the new state house has been successfully and satisfactorily accomplished. The work was so judiciously managed and the property so carefully handled that no loss or damage occurred. In the unfinished condition of the building, the arrangement of the books, papers and documents has been somewhat interfered with and is yet incomplete. They are in the main, however, easy of access, so that no serious inconvenience will be felt until the completion of the building, when even the little inconvenience now experienced can be removed.

CLASSIFYING AND INDEXING THE PAPERS AND RECORDS.

In my first biennial report, this subject was referred to at some length, and its importance fully set forth.- I am more fully convinced now that I was justified in urging the matter as strongly as I did, and in calling the attention of the General Assembly to the importance and necessity of properly preserving, classifying and indexing the State papers and records. Each day's experience in the transaction of the public business in this office demonstrates this necessity, and its convenience and economy as a great public benefit. One thing seems to be imperatively demanded, viz: The proper preservation of the files and records against the accidents of time and decay.

This Centennial year has furnished convincing proof of the sacredness of past history to the people. The demand upon this office during this year for facts and information in making up Centennial history and sketches has been constant, from all parts of the State, and from almost every county. The Index, incomplete as it is, still did wonderful service in complying with this demand. Many a link long since lost or forgotten in the history of the early counties was supplied by this means, which, without it, would have been an impossibility.

The last General Assembly appropriated four thousand dollars to defray the expenses of removing the State Archives and other property from the old to the new State House, and for arranging, classifying and continuing the index to the files and records. The expenses attending the removal amounted to \$1,064 75, leaving a balance of \$2,935 25 which was applied to the indexing of the enrolled laws and corporations until exhausted. With a view to making these indexes available for reference to the extent of their completion, as early as possible, two clerks were employed upon the work until the appropriation was exhausted. Considering the magnitude of the undertaking, and the care and labor necessary to be used in its preparation, I am well satisfied with the progress that has been made, and the character of the work has my unqualified approval. The outlay in my judgment, thus far, is insignificant in comparison with the importance and necessity of the work, and advantages already gained. In other words, the index does and will more than pay for the expense incurred in its preparation in the time saved in referring to the enrolled laws and other valuable papers on file in this office.

CORPORATION INDEX.

The index to Corporations, organized under the General laws of the State, comprising a well bound book of over 700 pages, and containing many thousand entries, has been completed to date, and is now in a condition to receive the entries of the organization of Corporations daily completed in this department. The entries in this book give a complete index to all private corporations organized under general law, during the existence of the State Government.

(*Note.*—Corporate companies chartered by special act of the Legislature are indexed in the Index to Enrolled Laws.)

The title page of the Corporation Index, and the classification of subjects will give a very good idea of its contents as follows, viz:

Title Page.—"Index to corporations organized in the State of Illinois, comprising a full and complete list alphabetically arranged, of all the corporations formed under the general laws of this State, classified and arranged in pursuance of law."

"Classification of Subjects.—Benevolent, Educational, Manufacturing, Mining, Railroads, Miscellaneous, Agriculture and Horticulture, Banks, Bridges, Cemeteries, Ferries, Insurance, Loan and Building Associations, Printing and Publishing, Religious Societies, Roads, Telegraphs, Transportation."

This index is specially convenient and useful in facilitating the business of the office since the constitution bars special legislation and compels organization of corporations under the general law. Its continuance, therefore, is a necessity as well as a duty imposed upon the Secretary of State by law.

INDEX TO ENROLLED LAWS.

The task of reading the original manuscript of the enrolled laws enacted by the Territorial and State Legislatures during a period of ninety years, and sifting out the subjects legislated upon and preparing an index thereto, is not an easy one, or one that admits of rapid execution. Still, there is no cause for complaint on this score. On the

contrary, I have the pleasure of reporting satisfactory progress so far as completed, and I specially invite the attention of the General Assembly both to the manner and the character of the work.

Memoranda of all subjects contained in the laws passed prior to and including the session of 1852, have been made ready for arrangement in alphabetical order by subjects and copying into the index book.

An index has been completed and is now in use including the year 1845, except the acts of the revision of the statutes of that year, of which further mention is made hereafter in this report. This index is called the "General Index to the Enrolled laws," and entry is made therein under its proper heading of every manner of subject legislated upon, and it is the object to make it as nearly as it can be made, a perfect index to the legislative history of the Territory and State of Illinois, from the earliest period of its existence down to the present. Unusual care has been taken in its preparation, not only to make it convenient of reference, but that it may be perfect. Experience has taught me that the public, though generous, is exacting in its demands. For this reason I have labored hard to have this work of indexing the public files and records commenced, and for the same reason I urge their completion. I feel sure it only requires an investigation on the part of the General Assembly for it to be as fully convinced of its necessity and importance as myself. Each paper as it is indexed is enclosed in a manila case, endorsed to correspond with the original paper it contains, and both are numbered with the file number, and also the number of the box, both corresponding with the numbers on the index, and by which the paper can be readily found. The papers are then filed away in metal boxes, which are deposited in the fire proof vaults, where it is reasonably certain that the survivors of the next Centennial year, can read and reflect upon the advance of our civilization and the extent of our population. The work of each session of the General Assembly is indexed separately, to secure more perfect system and avoid confusion by multiplying the entries under a given head too often.

The index is not alone confined to the original laws on file in this office, but each law as it is indexed, is compared with the printed law, and the page of the printed edition with the session, entered on the index, thus making the reference complete and invaluable, not only to this office, but to the legal profession and the courts for tracing the law on any given subject through the entire course of legislation in this State.

COUNTY INDEXES.

In addition to the General Index, an index for each county is being prepared, each county being indexed in a separate book. The object of these indexes is to group under appropriate headings the legislation relating directly or indirectly to any of the counties in the State, and index the subject to the county to which it belongs. Frequent inquiries are made for information concerning counties, or it may be the inquiry will be put in this form: "Was there ever 'such' law passed relating to some matter in 'such' county?"

In such a case the subject legislated upon is no guide to the county, and this index is being made to supply the want. Road surveys for instance run through several counties in almost every instance, yet frequently only one county is named in the law when several are in-

cluded. The intention is to make the index to each county so complete that its history can be traced in detail, commencing with the organization of the county, which is carefully noted; this is followed by any changes in its boundaries, location and removal of the county seat, the organization of cities, towns and villages, incorporated companies, concerning the revenues, schools, school lands, settlement of estates, roads, bridges, mills and dams, etc., in short a complete index to all legislation affecting any particular county, or any of its inhabitants at any period of its history.

The county indexes are not in so forward a state of completion as the General Index, owing to the failure of the appropriation, but are well under way, and in a short time can be made available for use.

I take pleasure in calling the attention of your Excellency to this subject and the manner in which the papers in this office are being filed for preservation and the arrangement of the indexes, and I most earnestly recommend in the interest of the public service a liberal annual appropriation to continue the work until the neglect of the past has been repaired. The law imposes upon the Secretary of State the duty "to make and keep proper indexes to the executive records and all public acts, resolutions, papers and documents in his office." [See Chap. 124, Sec. 5, Rev. Stat., 1870.]

Without the necessary appropriation, therefore, the law must remain a dead letter, much to the inconvenience of the people and to the detriment of the public service.

SUPPLYING LOST PAPERS.

In my last report I took occasion to call attention to the fact that in some way in the changing of the location of the State Government and the removal of the state papers and records, or the careless manner of keeping the files and records in early days, some papers have been lost or destroyed. Among them are a number of the enrolled laws of earlier years, public and private. As the work of arranging and indexing continues, missing papers from the files are occasionally developed. The most serious loss yet discovered is the manuscript of the revision of the statutes of 1845, which seem to be lost beyond recovery, as the most careful search has ended in failure. The last General Assembly took no action upon the matter, and the duty of devising some means for supplying the lost papers and others, if there are any, still devolves upon the General Assembly. The files should be completed and the only practicable way that suggests itself to my mind is to substitute for the originals, copies of the authorized printed editions and give them legal force by legislative enactment. With the exception of the revision of 1845, copies of lost laws have been made from the printed copy and filed and indexed in lieu of the original; but, of course, they are without legal force or effect as they now are. With the appropriation at my command I did not feel warranted in making these copies, except so far as was necessary to complete the files already indexed, and the revision of 1845 is still unsupplied and unprovided for. I would most respectfully recommend prompt action in this matter, and that sufficient appropriation be made to finish this important work.

FEES RECEIVED.

The total amount of fees received by me since the date of the close

of my last report, up to and including the 30th day of September, 1876, amount to \$9,100 60, which have been paid over to the State Treasurer, and for which I hold his receipts. The fees received during the six months ending September 30th, 1876, were paid into the State Treasury October 2d, 1876, and will not appear in the receipts as reported by the State Treasurer, for that reason.

APPROPRIATIONS AND EXPENDITURES.

The expenditures of this office, paid from the biennial appropriations under my control, from December 1, 1874, to September 30, 1876, inclusive, are as follows:

For furniture, repairs of office, postage, telegraphing, expressage, and other incidental expenses, the sum of \$2,686 06. Included in this amount is the balance of an unexpended appropriation, made by the 28th General Assembly, amounting to \$580 12, leaving unexpended from the appropriation made by the 29th General Assembly the sum of \$894 06.

There has been expended for clerk hire in my office the sum of \$14,666 67. Included in this amount is the sum of \$4,666 67, being the balance of an appropriation made by the 28th General Assembly, leaving unexpended and available for this purpose from the appropriation made by the 29th General Assembly the sum of \$6,000.

For porter in the office of the Secretary of State, provided by appropriation of the 28th General Assembly, during the occupancy of the old State House, the sum of \$665 21.

For porter and messenger, provided for by the 29th General Assembly, since July 1, 1875, the sum of \$1,500, leaving \$900 unexpended.

For State House janitor, provided for by the 28th General Assembly, during the occupancy of the old State House, the sum of \$665 21.

The 29th General Assembly provided for four janitors and two watchmen for the new State House, whose duties are assigned them by the State officers, for which an appropriation was made. From this appropriation the sum of \$5,966 33 has been expended (the Auditor's books show the sum of \$1,200 less than this, on account of the voucher being issued September 30th, but the warrant was not issued until October 1st, and does not show on his books as having been issued during the last quarter), leaving unexpended the sum of \$3,633 67.

For arranging, classifying and indexing the enrolled laws and other documents, and the expense attending the removal of the same to the new State House, the sum of \$6,546 67 has been expended. Included in this amount is the sum of \$2,546 67, the balance of an appropriation made by the 28th General Assembly.

For expenses attending the session of the 29th General Assembly the sum of \$13,935 54 was expended. Included in this amount is the balance of an additional appropriation, amounting to \$1,935 54, made by the 28th General Assembly; also a deficiency appropriation of \$12,000 made by the 29th General Assembly for the expenses attending that session.

From the appropriation of \$1,000 per annum made by the 29th General Assembly for advertising contracts, water rent, and for all expenses necessarily incurred by the Secretary of State in the discharge

of the duties imposed on him by law, and not otherwise provided for. the entire appropriation (\$2,000) has been exhausted. Of this amount the one item of advertising alone exhausts the appropriation for the year.

Since my last report there has been paid from the appropriation providing for the publication of the Revised Statutes the sum of \$4,683 75.

An appropriation of \$1,000 was made by the 29th General Assembly to defray the expenses of copying the laws, journals, etc., of the General Assembly. The amount appropriated was not sufficient to meet the expense of said work, leaving a deficiency to be provided for.

There has been paid to the contractors for public printing the sum of \$16,419 22 on their contract. For advertising, etc., the sum of \$1,037 15. For printing the sixth volume Geological Report the sum of \$1,756 77, leaving a balance of the appropriation for public printing of \$15,706 08 unexpended.

There has been paid to the contractor for public binding on his contract the sum of \$12,619 16, leaving unexpended at this date of the appropriation for that purpose the sum of \$1,822 54. There will be due the contractor on the termination of his contract more than the amount of this balance.

There has been paid from the appropriation for publishing the sixth volume of the Geological Report the sum of \$5,379 30. The Auditor's books show, in addition to this amount, as paid from the same appropriation, for engraving, etc., the sum of \$6,923 50; also the sum of \$2,550 00 for binding and \$1,756 77 from the appropriation for printing, making the total expense of the publication \$16,609 57.

The 29th General Assembly made an appropriation of \$2,500 per annum for lighting the new State House. Of this amount the sum of \$1,535 61 has been expended, leaving a balance unexpended of \$3,464 39. This amount, in my opinion, is sufficient to meet the expense for lighting the State House until the appropriation which will be made by the next General Assembly takes effect.

For heating, fuel, engineers and firemen for the new State House the sum of \$7,000 per annum was appropriated. From this appropriation there has been expended the sum of \$6,943 38, leaving a balance of \$7,056 62 unexpended and available for this purpose.

From the appropriation for printing paper and stationery there has been expended since the close of my last report the sum of \$28,482 08. Included in this amount is the balance of an appropriation made by the 28th General Assembly, amounting to \$5,942 22; also a deficiency appropriation of \$4,099 44, made by the 29th General Assembly; also a deficiency appropriation of \$10,000 for printing paper, and the sum of \$8,440 42 from the regular appropriation for printing paper and stationery made by the 29th General Assembly, leaving unexpended the sum of \$21,559 58.

STATIONERY.

Total amount of stationery received since November 4, 1874, is \$17,360 61.

There has been delivered to the various State departments, stationery, as follows—

General Assembly.....	\$3,210 22
Secretary's office	2,090 28

Executive office.....	842 15
Auditor's office.....	1,937 57
Treasurer's office.....	689 30
Attorney-General's office.....	369 30
Superintendent Public Instruction office	1,581 34
Copyists.....	38 80
Board of Equalization.....	11 00
For index records and incidental purposes	270 00
To the Public Printer for the use of the various executive offices for blanks, circulars, etc.....	2,701 22
Total.....	\$13,741 16
Stationery on hand	3,619 45

BOOK PAPER.

There has been received since November 4, 1874, 3,079 1-2 reams of book paper. From this amount there has been delivered to the Public Printer 1,949 reams; to the Public Binder, 96 reams; for the use of the various executive offices, 65 reams; leaving on hand 969 1-2 reams.

DEFICIENCIES.

As your Excellency is aware, the appropriations suggested to the 29th General Assembly, and recommended by you to be made, were, in many cases totally disregarded, and in others the amount asked for so materially reduced that the proper performance of the duties imposed upon the officers of State were in many instances interfered with. The result will be—unless an appropriation bill is passed by the 30th General Assembly, with the emergency clause—the expenses incurred by contracts made; the incidental expenses of the Secretary of State, and the incidental expenses of the session of the 30th General Assembly that have to be met and provided for by this office, cannot be paid, and the State will thus be obliged to become a debtor for the necessary expenses of the State government.

It is with regret that I am compelled to ask for appropriations to cover deficiencies that will exist before the usual appropriations are available; but I do so with the knowledge, that had the appropriations been made by the 29th General Assembly as asked for by the various State officers, and based upon close calculations of the necessary expenses of the State government, and as recommended in your message to that honorable body, the necessity of asking such an appropriation would not have arisen.

The Secretary of State, by virtue of his office, has imposed upon him the duty of providing for the comfort and convenience of the members of the General Assembly, and to do this, additional porters, janitors and workmen must always be employed on the occasion of the convening of the General Assembly. The expense of thus arranging for the coming session will have to be met by the Secretary of State, and properly should be paid out of the incidental appropriation. But so materially was that appropriation reduced by the last General Assembly from the amount asked for, that I will not be able to use one dollar of the incidental expense appropriation for this purpose; and the necessity which is imposed upon me of providing for the reception of the members of the General Assembly I must under-

take upon my own responsibility and look to the General Assembly for an appropriation to pay the expenses incurred.

With the knowledge by the last General Assembly, that in compliance with the law of the State, the commissioners of state contracts had entered into a contract with E. C. Matheny to prepare the laws, journals, etc., for distribution, at the rate of \$350 per annum, or \$700 for the two years; yet an appropriation of only \$500 was made for the two years, and no provision for the present contract, which takes effect the first Monday in November. Thus it will be seen that a deficiency of \$200 exists in the appropriation for the payment of the contract with Mr. Matheny which should be provided for, together with a sufficient amount to pay the expense of the same class of work for the next two years.

The appropriation for the office expenses of the Secretary of State was much less than was asked for and actually needed, so that a deficiency will exist before the regular appropriation will take effect.

The work of indexing and classifying the laws, etc., is of so much importance, and the appropriation having been exhausted, as heretofore stated, I would respectfully suggest that an amount sufficient, at least, to keep two clerks on the work, be made until the regular appropriation for this purpose takes effect.

STATE CONTRACTS.

Owing to the fact that the law requires reports to be made ending with the close of the fiscal year—which is one month before the State contracts expire—I will not be able to lay before your Excellency the exact cost and the final result of all the various contracts made two years ago; but as far as possible, I have made approximate figures and the results, as far as I have been able to ascertain them. In this connection I would respectfully suggest that the act of the General Assembly, so far as it fixes the time for the letting of and the date when the several contracts take effect, be so amended that all State contracts shall close with the fiscal year, thus giving ample time to make all settlements of such contracts and enabling the Secretary of State to embody in his report to the executive and the General Assembly the exact results of such contracts.

I am truly gratified to report to the General Assembly, through your Excellency, that the present law in relation to State contracts (with the exception as to the date of closing the same) has proved to be a very wise enactment of the 28th General Assembly. So far as I have been able to ascertain, the law has resulted in a great saving of money to the State; and all the contracts made by the commissioners of state contracts nearly two years ago, noted in and made a part of my last report, have, I am assured, been fulfilled in compliance with the law and to the entire satisfaction of the officers of State.

No final settlement has been made with the contractors for State printing or binding, but the contracts for printing paper, stationery, distribution of the laws, etc., copying of the laws, journals, etc., and for fuel, have all been closed and the cost thereof definitely ascertained, as hereinafter set forth.

The contract for printing does not expire until a month after the close of the date allowed by law into which matters of that nature can be incorporated in this report; but by my request, James K. Magie, the

Printer-Expert, has laid before me a statement of the condition of the contract, which I embody here as part of my report to your Excellency.

STATE OF ILLINOIS, SPRINGFIELD, OCT. 2, 1876.

HON. GEO. H. HARLOW, *Secretary of State* :

SIR—In response to your request asking for a statement as to the condition of the work of the contractors for the State printing for the two years ending on the first Monday of November, 1876, also asking for the cost of the printing, and also the amount of paper used for the same, I have the honor to report, that as the contract does not expire until the 6th of November, 1876, and there being at this time unfinished work in the hands of the printer, and probably a few orders yet to be made, I am unable to give you precise figures, and can only approximate results. I have the printer's bills for only a portion of the work done, and as I compute the work and ascertain its cost before I see the printer's bills, the figures I give you will be my own and not those which may be claimed by the contractors. I am happy to say, however, that there has been so little variance between my own computations and those made by the contractors in the bills already presented, that I feel assured that there will be no material difference in the final settlement.

My computations upon the work already finished and accepted by the State under the present contract aggregate about \$13,000. The work now in progress, with that which may yet be ordered, will not exceed \$5,000, but will closely approximate that sum. In round figures I estimate that \$18,000 will pay for all the printing which has been and which will be printed under the present contract. There are bills pending from the printer to the amount of about \$1,000, for paper cutting, ruling and some printing which appears to have been done for the State, but not regularly ordered. These bills will be presented to the Commissioners of State Contracts at their next meeting for their action.

In regard to the amount of paper used my figures are incomplete and must necessarily remain so until the work now in progress is finished. The print paper is delivered to the contractors in bulk and receipts taken for the same. My calculations thus far extend to about 1,600 reams used. The whole number of reams used, with that which is likely to be used under the present contract, will not exceed 1,800 reams. This has reference to what we call the 45 lb. paper, or that which is commonly used in the printing of reports. We have used but few reams comparatively of the 60 lb. paper—not to exceed, I think, 80 reams.

Upon closing up the work now in hand the balance will be struck between the amount of paper delivered to the printer and the amount consumed in printing, upon which a settlement may be made in pursuance of law.

The hard paper, or paper for blanks, circulars and miscellaneous work, is not delivered to the printer in bulk, but only as required. This paper includes various qualities, sizes, etc., and the paper is now delivered cut to the size required by the job. In the early part of the contract the paper was delivered to the printer uncut, and it frequently happened that odd-sized forms made some waste of paper. It was a mooted question as to whether the printer was required by his contract to furnish a paper-cutter for the necessary cutting of paper. This question you solved by the purchase, on behalf of the State, of a paper cutter which machine is found to be of much use, enabling us to deliver paper at any size required, all remnants remaining with the State to be used in such jobs for which they are adapted.

The amount used of this class of paper for two years past foots up as follows :

20 reams.....	12 lb.....	10x16
336 ".....	14 ".....	14x17
18 ".....	28 ".....	17x28
13 ".....	24 ".....	16x21
23 ".....	24 ".....	17x22
15 ".....	40 ".....	18x23
10 ".....	(bond paper).....	22x28
4 ".....	".....	17x28

The above includes paper for Registry blanks and all the blanks, circulars, etc., used by the General Assembly and the various executive departments of the State.

You ask me to note such points in the practical operation of the law under which the printing is done, as my observation and experience may suggest as worthy of mention. As a whole, I deem the law eminently wise and calculated to bring to bear in behalf of the State every principle of economy that can be made applicable in the public printing. I can suggest no change that would reduce expenditures. In fact, the law is subject to adverse criticism only in its rigorous and inflexible features. Under a more flexible law we might gratify the taste in a better or more artistic style of printing, but limit in style necessarily limits expense.

The present law came into force on the first of July, 1874, and a few days thereafter I was honored by the Governor with the appointment of Printer Expert in pursuance of the law. The State offices were then in the old State House and subject to many inconveniences for want of room. In the new State House I have completed a thorough organization of my official duties, the details of which it is unnecessary to enumerate. Suffice it to say, that a specimen of each and everything printed for the State is carefully filed, with the number printed, by whose order and the cost of the same endorsed thereon. These specimens are sub-divided in such manner as to be readily produced on a call for any particular specimen. The books show the cost of the public printing as it progresses, with the quantity of paper used in the same.

Very Respectfully,
JAMES K. MAGIE,
Printer Expert for the State.

THE BINDING CONTRACT.

The contract for binding, like that for the public printing, does not expire for a month after the close of this report, but as nearly if not quite all the work called for by said contract has been done, I am enabled to report very nearly the cost of this work to the State.

The amount appropriated by the last General Assembly was \$5,000 00 per annum, which is less than the estimate made and less than the contract will amount to, leaving a small deficiency in order to pay the contract or for the work done by him for the State. As near as can be ascertained, without a final settlement, the cost of the State binding under the present contract will amount to the sum of \$16,000 00.

DISTRIBUTION OF LAWS, ETC.

The contract for packing and preparing the laws, journals, reports, etc., for distribution, as provided by law, was let to E. C. Matheny for \$350 00 per annum, or \$700 00 for the two years. The last General Assembly, as before stated in this report, appropriated only \$500 00—although the contract was then in force. The work has been performed in accordance with the contract but there is a deficiency of \$200 00 that will have to be met as before suggested.

COPYING CONTRACT.

The contract awarded to W. P. Emory for copying the laws, journals, etc., of the 29th General Assembly, has been completed at a cost of \$1,754 92.

FUEL CONTRACT.

The fuel (bituminous coal) furnished under the contract of J. C. Canfield and P. W. Harts, has cost the State the sum of \$4,930 27.

PRINTING PAPER.

The amount of paper furnished under the contract with the Cleveland Paper Company, amounted to 3,079½ reams, which cost in the aggregate \$17,999 91.

STATIONERY AND PAPER.

Under the contract with Geo. W. Chatterton Jr., for the stationery required by the State, there has been expended for the same the sum of \$12,243 06.

NEW STATE CONTRACTS.

All the contracts provided to be let under the act in relation to State contracts in force July 1, 1874, have been made for two years from the first Monday in November, 1876, and are as follows:

PRINTING.

Fourteen bids were received for the contract for the public printing, and the award was made to David W. Lusk, of Pekin, for all of the six classes, his bid being the lowest of them all, and at the following prices:—

Class 1st. Composition per 1,000 ems, plain 10c, figure 3c, rule and figure 3c, and for press work 13c per 100 impressions.

- Class 2nd.* Composition per 1,000 ems, plain 16c, figure 20c, rule and figure 28c, and for press work 10c per 100 impressions.
- Class 3rd.* Composition per 1,000 ems, plain 20c, figure 20c, rule and figure 28c, and for press work 9c per 100 impressions.
- Class 4th.* Composition per 1,000 ems, plain 20c, figure 20c, rule and figure 37c, and for press work 7c per 100 impressions.
- Class 5th.* For printing, stitching, ruling, lining, indexing and binding election registers, 3c each.
- Class 6th.* Composition per 1,000 ems, plain 10c, figure 20c, rule and figure 35c, and for press work 4c per 100 impressions.

BINDING.

For the contract for the public binding there were eight bids of which that of David W. Lusk, of Pekin, was the lowest, and the contract was awarded to him at the following rates: Class first, per volume, 10 cents; class second, per volume, $16\frac{1}{2}$ cents; class third, per volume, $10\frac{1}{2}$ cents; class fourth, per 100 pages, $\frac{3}{8}$ cent; class fifth, per 100 pages, $\frac{1}{2}$ cent.

PAPER AND STATIONERY.

Class 1st. This class consists of book paper, 25x38 inches, 45 lbs. to the ream. There were seven bids for the contract, which was awarded to P. W. Harts, of Springfield, he being the lowest bidder.

Class 2nd. This class includes flat cap, cover and bond papers, for which there were eight bids received. The lowest was that of the Cleveland Paper Co. of Cleveland, Ohio, and the contract was awarded accordingly.

Class 3rd. For this class, consisting of letter and wrapping papers, envelopes and other articles of stationery, there were eight bids for the contract, the lowest being that of Judson M. W. Jones, of Chicago, to whom the contract was awarded.

COPYING.

The contract for copying the laws, journals, etc., of the 30th General Assembly there were three bids; the contract was awarded to M. V. B. Osmer, of Springfield, at the rate of 1 11-12 cents per 100 words, being the lowest bid offered.

DISTRIBUTION OF THE LAWS, ETC.

There were five bids offered for preparing the laws, journals, etc., of 30th General Assembly for distribution, the contract for which was awarded to M. V. B. Osmer, of Springfield, at \$297 50 per annum for the two years of his contract.

FUEL.

The only fuel used by the State since the occupancy of the new State house is bituminous coal. But one bid was offered for the contract, which was at the rate of \$2 25 per ton. This bid was rejected by the Board of Commissioners of State contracts, and the Secretary of State

was directed to re-advertise for proposals to furnish coal for the State. Under this letting there were eight bids received, two of which were at the rate of \$2 10 per ton, and the lowest offered. The contract was therefore awarded by lot, as provided in the statute, and fell to Albert L. Ide, of Springfield, at \$2 10 per ton for such quantity of bituminous coal as the State may require during the two years of his contract.

With each of these contracts approved bonds were required and executed as follows :

Printing, \$60,000.

Binding, \$10,000.

PAPER AND STATIONERY.

Class one, \$10,000 00; class two, \$5,000 00; class three, \$10,000 00; copying, \$2,500 00; distribution of laws, etc., \$1,500 00; fuel, \$10,000 00.

These contracts and bonds are on file in the office of the Secretary of State, and are also made a matter of record in the proceedings of the Board of Commissioners of State Contracts, and on the Executive Record of the State. The contracts are made at figures very much lower than heretofore ever made by the State.

INCORPORATED COMPANIES.

The statute regarding the organization of incorporated companies for general purposes, has proved to be one of the best and wisest acts of the General Assembly, and its working seems to give entire satisfaction to the people of the State.

Since the close of my last report, applications have been received and licenses issued for the formation of seven hundred and sixty companies. Of these, five hundred and thirteen have become completely organized and received certificates of incorporation, under the sections of the law providing for the incorporation of companies for pecuniary profit. They are classified as follows :

Manufacturing Companies 202, of which 158 are completely organized.			
Mining Companies.....	64,	"	46
Printing and Publishing Co's	39,	"	28
Driving Park and Fair Ass.	18,	"	13
Library Associations.....	17,	"	17
Cemetery Associations.....	41,	"	40
Distilling Co's.....	11,	"	10
Gas Companies.....	17,	"	9
Law Associations.....	3,	"	3
Art Associations.....	3,	"	2
Telegraph Companies.....	4,	"	3
Patrons of Husbandry.....	73,	"	44
Horse Railway Co's.....	8,	"	8
Plank and Gravel Road Co's	4,	"	4
Water Works Co's.....	4,	"	2
Ferry and Boat Co's.....	5,	"	5
Amusement Associations...	164,	"	46
Miscellaneous.....	83,	"	75

Under the section of the act providing for the formation of associations not for pecuniary profit, there have been one hundred and eighty-six incorporated, as follows:

Educational	34
Religious.....	14
Literary.....	5
Benevolent.....	103

RAILROAD INCORPORATIONS.

Since the general law regarding the incorporation of Railroads took effect, up to the close of my former report, seventy Railroad Companies had fully organized under the law. Since that date articles incorporating the following named companies have been recorded in this office, viz.:

The Watertown Railroad Company, of the State of Illinois.
 Grape Creek Railroad Company.
 Chicago, Rockford and Northern Railroad Company.
 Chicago and Evanston Narrow Gauge Railway Company.
 Chicago Transfer Railway Company.
 Calumet River Railway Company.
 Peoria and Eastern Railway Company.
 St. Louis and Eastern Railway Company.
 Springfield, Decatur and Indianapolis Railway Company.
 Morrison, Mt. Carroll and South Eastern Railroad Company.
 Chicago and Batavia Railway Company.
 South Chicago Transfer Railroad Company.
 Chicago Belt Railroad Company.
 Burlington, Monmouth and Illinois River Railway Company.
 South Chicago and Calumet Railway Company.
 Chicago Transfer Railroad Company.
 Havana and San Jose Narrow Gauge Railroad Company.
 Lewiston and Havana Narrow Gauge Railway Company.
 St. Louis, Marine and Edwardsville Railroad.
 Keokuk, Galesburg and Chicago Railway.
 Peoria and Burlington Railway.
 Chicago River Railway.
 Rock Island and Edwards River Railroad Company.
 Rock Island and Mercer County Railroad.
 St. Louis, Rock Island and Chicago Railroad Company.
 St. Louis, Chester and Western Railway Company.
 Le Roy Narrow Gauge Railroad.
 Rock River Valley Railroad Company.
 Chicago, Braidwood and Southern Railway Company.
 Freeport, Pecatonica Valley and State Line Railway Company.
 Pekin, Lincoln and Decatur Railway Company.
 Chicago and St. Louis Airline Railroad Company.
 Chicago and North Shore Railway Company.
 Lafayette, Bloomington and Mississippi Railroad Company.

Being thirty-four in number, and added to those before reported, make in the aggregate one hundred and four companies incorporated since the law took effect.

CITIES, TOWNS AND VILLAGES.

Under the provisions of the law regarding the organization of cities, towns and villages since my last report, eleven cities and sixty-one villages have been reported to me as organized, viz :

CITIES.

Name.	County.	Date of organization.
St. Charles	Kane	October 17, 1874.
Red Bud	Randolph	January 19, 1875.
Wenona	Marshall	August 26, 1872.
Mount Sterling	Brown	March 13, 1875.
Kinmundy	Marion	April 6, 1875.
Chicago	Cook	April 23, 1875.
Murphysboro	Jackson	June 28, 1875.
Highland Park	Lake	December 6, 1875.
Ashley	Washington	January 18, 1876.
Lanark	Carroll	May 2, 1876.
Joliet	Will	August 5, 1876.

VILLAGES.

Name.	County.	Date of organization.
Time	Pike	November 9, 1874.
Crotty	LaSalle	December 2, 1874.
Belle Rive	Jefferson	January 1, 1875.
Robinson	Crawford	January 16, 1875.
Monce	Will	November 9, 1874.
Hutsonville	Crawford	January 12, 1875.
Benton	Franklin	January 27, 1875.
Freeburg	St. Clair	March 8, 1875.
Newark	Kendall	February 13, 1875.
Towanda	McLean	January 30, 1875.
Caseville	St. Clair	April 22, 1875.
Stanford	McLean	June 22, 1874.
Martinsville	Clark	March 15, 1875.
Shabbona	DeKalb	February 20, 1875.
Mt. Morris	Ogle	March 27, 1875.
Athens	Menard	March 31, 1875.
Dorchester	Macoupin	March 2, 1875.
Farina	Fayette	March 29, 1875.
Borrbonois	Kankakee	April 13, 1875.
Philo	Champaign	April 19, 1875.
Greenup	Cumberland	Septem'r 14, 1872.
Tamaroa	Perry	June 7, 1875.
Elizabethtown	Hardin	June 23, 1873.
Chandlerville	Cass	July 21, 1874.
South Danville	Vermilion	March 14, 1875.
Ashkum	Iroquois	April 13, 1875.
Altamont	Effingham	August 8, 1872.
Roseville	Warren	May 8, 1875.
Cowden	Shelby	June 4, 1875.
Enfield	White	July 30, 1875.
Riverside	Cook	July 10, 1875.
Loami	Sangamon	July 29, 1875.
Rapids City	Rock Island	August 12, 1875.
Compton	Lee	December 6, 1875.
Westfield	Clark	August 31, 1875.
Wilmington	Greene	Decemb'r 25, 1875.
Dana	LaSalle	Septem'r 20, 1875.
Xenia	Clay	March 16, 1875.
Metamora	Woodford	April 26, 1875.
Exeter	Scott	January 3, 1876.
Bardolph	McDonough	February 5, 1876.
Onarga	Iroquois	March 30, 1876.
Wapella	DeWitt	February 26, 1876.
Martinton	Iroquois	Septemb'r 7, 1875.
Blue Mound	Macon	February 17, 1876.
Mansfield	Piatt	March 3, 1876.
Coal Valley	Rock Island	March 11, 1876.
New Rutland	LaSalle	March 28, 1876.
Newman	Douglas	Decemb'r 27, 1872.
Mt. Pulaski	Logan	April 3, 1876.
Casey	Clark	May 15, 1874.
Hudson	McLean	October 2, 1872.
Genoa	DeKalb	February 26, 1876.
Shannon	Carroll	April 6, 1876.
Plymouth	Hanceck	June 29, 1876.
Pleasant Plains	Sangamon	April 8, 1876.
Apple River	JoDavless	July 18, 1876.
Erie	Whiteside	August 20, 1872.
Ludlow	Champaign	June 1, 1876.
Warren	JoDavless	July 24, 1876.
Bath	Mason	June 30, 1876.

CHANGE OF NAME OF CITIES AND VILLAGES.

Under the provisions of law on this subject but little has been done. The following are the only places that have availed themselves of its privileges:

Milton, Coles county, to that of Humboldt, April 10, 1875.

New Rutland, LaSalle county, to that of Rutland, August 19, 1876.

Clintonville, Kane county, to that of South Elgin, Sept. 29, 1876.

REVISED STATUTES OF 1874.

The publication of the revised statutes of 1874 by the State seems to have given entire satisfaction to the public. As reported to your Excellency, up to the 15th day of December, 1874, I had, in compliance with the law on the subject, distributed nine thousand two hundred and twenty-seven copies, of which number five thousand copies were sent to the county clerks for sale as the law provides. Since that date I have distributed 5,558 copies of the statutes as follows:

To Justices of the Peace and others entitled to them under the law four hundred and eighty-three, and to county clerks for sale, five thousand and seventy-five, leaving 215 on hand.

The total amount expended by the State in the publication and distribution of the statutes is \$29,651 65.

The number of copies sold by county clerks and the sum total of the sales thereof as reported to the Auditor amounts to \$15,112 00 which has been paid to the several county collectors, their receipts for the same being on file in this office. The State is thus reimbursed in part for the cost of publication of this valuable compilation of its statute law.

STATE LIBRARY.

In the judgment of the majority of the 29th General Assembly it was decided to make no appropriations for the use of the State Library, though strongly favored not only by your Excellency and myself but also by a large number of that Legislative Assembly. Not one cent having been appropriated for the purchase of books or documents for the benefit of the library, I have been obliged to keep up the necessary repairs thereof from the appropriations for office and incidental expenses.

The system of exchange which for many years has been kept up between this State and other States and Territories still continues, and by that courtesy of exchange and from purchase, gift, etc., the following additions have been made to the catalogue of the State Library:

Title of Book.	Name of Donor.	Name of Author.
Illinois Senate Journal, 1st session 1st General Assembly 1818.....	Hon. Wm. Thomas.....	
Illinois House Journal 1st session 1st General Assembly, 1818.....	" " ".....	
History of the 17th Regiment Indiana Volunteers.....	D. H. Chase, M. D.....	Wm. E. Doyle.
Trade and Commerce of St. Louis, Mo.....	" " ".....	Geo. H. Morgan, Secy.

The room planned for and designated as the "DOCUMENT LIBRARY" in the State House is now used as the State Library, and is admirably adapted for the purpose, though, as reported to your Excellency heretofore, the room intended for the State Library proper is on the same floor occupied by both branches of the General Assembly; but this room is not finished, and if it were, there are not books enough of the kind which it was designed to receive to fill over two or three of the alcoves, and as there was no appropriation made for the purchase of additional books, the Document Library will be large enough to accommodate the State for the next two years at least. In this connection I will take the liberty of repeating a portion of my last report in order that the members of the 30th General Assembly may have their attention called to what, in my judgment, is an important subject:

Illinois now occupies the proud and honorable position of the fourth if not the third State in the Union, so far as population and wealth are concerned, and does she not stand equal to any State where the intelligence and educational interests of her people are considered? If this is true, the library of the State should be as complete and valuable in every respect as that of any other State. In order to make it so, the members of the General Assembly have a duty to perform which they not only owe to themselves, but to the reputation of the proud name of our State. To make the library what it should be will require the expenditure of money, and that must be appropriated by the General Assembly. The appropriation should be liberal, in order that the thousands of books needed may be placed upon the shelves of the new library room by the time the members of the 30th General Assembly are called upon to take their seats in the new and commodious rooms designed for their use in the new capitol building.

I would again most respectfully call your attention to the matter of an appropriation for the State Library. It is a matter of much importance, and I hope your Excellency will recommend that the sub-

ject receive the careful attention of the members of the General Assembly which convenes this winter, and that the proper steps will be taken to place in the hands of the Library Commissioners a sufficient sum of money to replenish the library and to keep it in a condition that will not do our great State discredit.

Owing to the rearrangement of the books in the Document Library, and to provide for the convenience of the members of the General Assembly and State officers, I have been obliged to have a new catalogue of the library published.

The number of books of all descriptions reported in the library and duplicate volumes in store at the close of my last report was 34,353. Since then, by exchange, gift and otherwise, including those published by this State, there have been added 10,452, making a total of all kinds now on hand 44,805.

The following newspapers and magazines are supplied gratuitously to the State Library by their publishers, and I take pleasure in acknowledging the courtesy thus extended to this Department :

DAILY NEWSPAPERS.

Illinois State Journal, Springfield.
Post and Mail, Chicago.
Evening Courier, Chicago.
Elgin News, Elgin.
Bloomington Leader, Bloomington.
Joliet Sun, Joliet.
Mattoon Journal, Mattoon.
Globe-Democrat, St. Louis, Mo.

WEEKLIES.

Albion Journal, Albion.
Braidwood Republican, Braidwood.
Ottawa Free Trader, Ottawa.
The Appeal, Bloomington.
Watseka Republican, Watseka.
Prairie Farmer, Chicago.
Mason County Republican, Havana.
Mattoon Journal, Mattoon.
Central Illinoian, Beardstown.
Carroll County Mirror, Mt. Carroll.
Kewanee Courier, Kewanee.
Bushnell Record, Bushnell.
The Gleaner, Bushnell.
Pulaski Patriot, Mound City.
Belleville Advocate, Belleville.

The Book Buyer, New York.
The Western, St. Louis.
Western Stock Journal and Farmer, Cedar Rapids, Ia.
The Legal Adviser, Chicago, Ill.
Western Agriculturist, Quincy, Ill.

CENSUS RETURNS.

In my last report to your Excellency I strongly urged that some law should be enacted providing for taking the census of our State independent of that of the General Government, which is now made every ten years. The State Census should contain, as far as possible, a full digest of the wealth, population, agricultural, manufacturing and mineral resources of the State, and its great capabilities for the successful prosecution of all branches of labor. I still consider this a subject of such importance as to deserve the serious consideration of the General Assembly, and I hope will so impress your own mind as to prompt you to call the attention of the Legislature to this matter.

Under authority of the act providing for the removal of the state archives I have gathered up and well bound in suitable books all the duplicate copies of the census returns taken by authority of the State (Government) and placed in my custody, and they are now in good condition for general reference.

WEIGHTS AND MEASURES.

The important subject of testing weights and measures by the United States standards, as is now to a limited extent provided for by law, seems to have been almost entirely ignored by the people and officers of the various counties in the State; but I deem the matter of having a correct and reliable standard of weights and measures one of great importance, and the law should be enforced.

In my former report I suggested that a law be prepared more stringent in its nature and one that would be by penalties or otherwise *strictly* enforced and carried out. I stated at that time that not a single set of weights or measures had been sent to the state sealer to be tested, and I now have to report that although nearly two years more have passed, not one provision of the law has the state sealer been called upon to perform by request of the county sealers throughout the State. So long as a law fixing the weights of articles and the capacities of measures, and providing for accuracy therein, is on the statute, it should be enforced, and if there is not power sufficient in the law to carry out its intention, the act should be amended to such an extent as will make it effective and, (as it is designed to be,) a benefit to the people of the State, the buyer as well as the seller.

I am much gratified to report to your Excellency that owing to the wisdom and generosity of the General Government, and through the kindness and courtesy of the Hon. J. E. Hilgard, in charge of the U. S. standard weights and measures at Washington, D. C.; Illinois has been furnished with a full, complete and costly set of balances, weights and measures, with all articles necessary to carry out the intention of the law of the United States and that of the State relating to the testing of weights and measures. The balances (three in number) and the exchanges of the old weights and yard measures mentioned in my last report were received through the courtesy of Mr. Hilgard in March 1875, but owing to the incomplete condition of the State House at that time, they were not unpacked nor ready for use until the occupancy of the new building by the State officers. They are now placed in order in the room especially designed and constructed for their use.

THE METRIC SYSTEM.

In accordance with a joint resolution of Congress, of July 27, 1866,

directing the Secretary of the Treasury to furnish each State one set of the standard weights and measures of the metric system; the set appropriated to this State has been received. The kind and nature of these weights and measures together with a brief description of the metric system, prepared by the Hon. J. E. Hilgard, Inspector of U. S. standard weights and measures, under whose direction they have been constructed and adjusted, I herewith submit. This report contains valuable information on the subject, which will doubtless interest your Excellency, and the people of the State and their representatives in the General Assembly :

U. S. COAST SURVEY OFFICE,
BUREAU OF WEIGHTS AND MEASURES.

Papers relating to Metric Standards, distributed to the States of the Union under a Joint Resolution of Congress of July 27, 1866.

I.

An act to authorize the use of the Metric System of Weights and Measures.

Be it enacted by the Senate and House of Representatives of the United States in Congress assembled, That from and after the passage of this act it shall be lawful throughout the United States of America to employ the weights and measures of the metric system, and no contract or dealing, or pleading in any court, shall be deemed invalid or liable to objection because the weights or measures expressed or referred to therein are weights or measures of the metric system.

Sec. 2. *And be it further enacted, That the tables in the schedule hereto annexed shall be recognized in the construction of contracts, and in all legal proceedings, as establishing, in terms of the weights and measures now in use in the United States, the equivalents of the weights and measures expressed therein in terms of the metric system; and said tables may be lawfully used for computing, determining, and expressing in customary weights and measures the weights and measures of the metric system.*

Measures of Length.

Metric denominations and values.		Equivalents in denominations in use.	
Myriameter.....	10 000 meters.	6.2317	miles.
Kilometer.....	1 000 meters.	0.62317	mile, or 3,280 feet 10 inches.
Hectometer.....	100 meters.	328	feet 1 inch.
Dekameter.....	10 meters.	393.7	inches.
Meter.....	1 meter.	39.37	inches.
Decimeter.....	1-10 of a meter.	3.937	inches.
Centimeter.....	1-100 of a meter.	0.3937	inch.
Millimeter.....	1-1000 of a meter.	0.0394	inch.

Measures of Surface.

Metric denominations and values.		Equivalents in denominations in use.	
Hectare.....	10,000 square meters.	2.471	acres.
Are.....	100 square meters.	119.6	square yards.
Centare.....	1 square meter.	1.550	square inches.

Measures of Capacity.

Metric denominations and values.			Equivalents in denominations in use.	
Names.	Number of Liters.	Cubic Measure.	Dry measure.	Liquid or wine measure.
Kiloliter or Stere.....	1,000	1 cubic meter.....	1.308 cubic yards.....	264.17 gallons.
Hectoliter.....	100	1-10 of a cubic meter.....	2 bush. and 3.35 pecks.....	26.417 gallons.
Dekaliter.....	10	10 cubic decimeters.....	9.08 quarts.....	2.6417 gallons.
Liter.....	1	1 cubic decimeter.....	0.908 quart.....	1.0567 quarts.
Decaliter.....	1-10	1-10 of a cubic decimeter.....	6.1022 cubic inches.....	0.845 gill.
Centiliter.....	1-100	10 cubic centimeters.....	0.6102 cubic inch.....	0.338 fluid ounces.
Milliliter.....	1-1000	1 cubic centimeter.....	0.061 cubic inch.....	0.27 fluid drams.

Weights.

Metric denominations and values.			Equivalents in denominations in use.
Names.	Number of Grams.	Weight of what quality of water at maximum density.	Avoirdupois weight.
Millier or Tonneau.....	1,000,000	1 cubic meter.....	2204.6 pounds.
Quintal.....	100,000	1 hectoliter.....	220.43 pounds.
Myriagram.....	10,000	10 liters.....	22.046 pounds.
Kilogram or Kilo.....	1,000	1 liter.....	2.2046 pounds.
Hectogram.....	100	1 decaliter.....	3.5274 ounces.
Dekagram.....	10	10 cubic centimeters.....	0.3527 ounce.
Gram.....	1	1 cubic centimeter.....	15.432 grains.
Decigram.....	1-10	1-10 of a cubic centimeter.....	1.5432 grains.
Centigram.....	1-100	10 cubic millimeters.....	0.1543 grain.
Milligram.....	1-1000	1 cubic millimeter.....	0.0154 grain.

Approved July 28th, 1866.

Joint resolution to enable the Secretary of the Treasury to furnish to each State one set of the Standard Weights and Measures of the Metric System.

Be it resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury be, and he is hereby authorized and directed to furnish to each State, to be delivered to the governor thereof, one set of the standard weights and measures of the metric system for the use of the States respectively.

Approved July 27, 1866.

II.

METRIC STANDARDS FOR THE STATES.

1. List of Standards to be furnished to the States.

Length : One meter, end measure.
 One meter, line measure, divided.
 Weight : One kilogram.
 One demikilogram.
 One gram, with subdivisions.
 One ten kilogram.
 Capacity : One liter.
 One decaliter.

2. Particulars of Meters.

The end measure is of cast steel, ten millimeters thick, thirty wide, with cylindrical ends, and small cylindrical projections in the axis, of hardened steel, with abutting faces three millimeters in diameter, equal to one meter, legal standard of France, at the temperature of melting ice.

The divided line measure is of brass, composed of three parts of copper to one of zinc, the bar extending beyond the terminal lines; divided into decimeters, one decimeter into centimeters, and one centimeter into millimeters, the length between the terminal lines being equal to one meter at a temperature of the bar of about 68° Fahrenheit, and each bar bears an inscription stating the temperature at which its length is equal to one meter. Each of these line measures is provided with a convenient tracing frame for copying the division.

3. Particulars of Weights.

The kilogram is of brass, of an ascertained specific gravity; it is equal when weighed in a vacuum to the weight of the French platinum standard kilogram in vacuum.

Demikilogram, gram, and fractions to milligram.

Myriagram, or ten kilograms.

The form of the weights is similar to the present American standard weights, so as to be handled with hooks, forks, and pincers, which are provided.

4. Particulars of Capacity Measures.

The standard liter is of brass, composed of fifteen parts of the brass used for the meters, melted together with twelve parts of copper, and one part of tin; of a form similar to the American quart, containing a volume of distilled water, which, when weighed in vacuum, equals the weight of one French standard kilogram in vacuum, the water

being at the temperature of its greatest density, and the vessel at the same temperature.

The decaliter contains ten liters, as thus defined.

III.

METRIC STANDARDS.

The three packing boxes contain a set of standard metric weights and measures, carefully packed in walnut cases.

The packing box marked "Weight" contains a Decakilogram, Kilogram, Demikilogram, Gram, and the decimal fractions of a Gram to include a Milligram.

The box marked "Volume" contains a Decaliter and Liter, with their ground glass covers.

The box marked "Length" contains two walnut cases. In one of these is packed a steel meter with hardened steel ends protected by brass caps; this is an end measure. The other walnut case contains a brass meter, which is divided into Decimeters, Centimeters, and Millimeters, and is a line measure.

In the same case and lying parallel with the brass meter is a bar of wood of the same dimensions as the meter, held firmly in its place by means of wooden wedges.

This is so placed as to show the manner in which a bar of brass of the same dimensions can be secured for the purpose of having transferred upon it the meter and its decimal parts.

A Tracer is packed in the box with the meter, and is operated in the following manner:

After the brass bar, on which it is desired to have the meter and its parts transferred, is well secured in position by means of the wooden wedges, the Tracer is placed upon the standard bar in such a position that the short line under the magnifying glass shall accord with a line on the standard bar, and while held firmly in this position, the movable portion of the Tracer holding the cutter is passed carefully over the brass bar making a mark upon it at right angles with its length. The Tracer is then moved so as to accord with another line on the standard bar, and another cut made on the brass bar. This operation is continued until a complete copy of the standard is transferred to the brass bar.

By the side of the cutter is a long steel screw which can be set as a guide to determine the depth of the cut made by the cutter.

A revolving head on the Tracer with two notches filed in it, is placed there for the purpose of determining the length of the line cut. A steel screw in the movable portion of the Tracer is so placed as to strike against this head and stop the motion of the cutter in that direction, and it will be readily seen that three different lengths of lines may be made by moving the head so that the stop screw will at different times strike on the face of the revolving head and in the notches.

Before the brass bar is put in place it will be necessary to have it well prepared with a smooth surface having lines traced on it in the direction of its length, similar to those on the standard.

The standard bar should never be moved from its place in the case.

The weights should never be touched with the naked hand. Lifters are placed in the cases.

J. E. HILGARD,
Inspector U. S. Standard Weights and Measures.

U. S. COAST SURVEY OFFICE,
WASHINGTON, March 1, 1876.

If the law on Weights and Measures is amended, as suggested, the legal weights of the following articles (of which no mention is made in the present law) should be established and fixed :

Hungarian Grass Seed, per bushel,
Orchard Grass Seed, per bushel,
Red-top Grass Seed, per bushel,
Millet Seed, per bushel,
Broom Corn Seed, per bushel,
Top Onions, per bushel,
Osage Orange Seed, per bushel

Peas, per bushel.
Charcoal, per bushel,
Coke, per bushel,
Beef and Pork, per barrel,
Flour, per barrel,
Whitefish and Trout, per half barrel.

SUPREME COURT REPORTS.

In my last report to your Excellency, I alluded to the matter of the distribution of the State Supreme Court Reports, for which there was no provision made, and to which you called the attention of the General Assembly and recommended action thereon. I regret to say that the matter was not acted upon by that body, and the whole subject is in a much more unsatisfactory condition now than at that date. Section 60, chapter 127, page 1004 of the Revised Statutes of 1874 reads as follows :

"§ 60. The reports of the decisions of the supreme court shall be distributed as follows, viz.: Five copies to the library of Congress, one copy to the President of the United States, one copy to each State and Territorial library, one copy to each judge of the superior court of Cook county, one copy to each clerk of a circuit court, one copy to each law institute in this State, one copy to each State officer required by law to reside at the seat of government, five copies shall be deposited in the State library, and five copies in each supreme court library."

By this section the Secretary of State is directed to distribute a large number of the Illinois Supreme Court Reports to the many important offices and courts designated. But the Legislature, up to this time, has failed to place in the hands of the Secretary of State the power to comply with this peremptory provision of the law. In my judgment it is one of the greatest importance, for it is only by the system of exchange with the different States and Territories that the Secretary of State of Illinois has been enabled to keep on the shelves of the State Supreme Court library, the reports of the Supreme Court of the several States; and as I have not been able since the 1st of July, 1874, to make an interchange of this courtesy, I am receiving very few reports from the several States and Territories, and only from those which expect in the future to receive the back volumes of the Reports of this State. Prior to July 1, 1874, the Secretary of State had an appropriation especially for the purchase of the Supreme Court Reports as soon as issued, but since volume 62 was purchased and distributed, none have been purchased or distributed by the Secretary of State, although there has been

about ten volumes issued by the Reporter of the Supreme Court since that time. I deem the matter of so much importance that I trust you will think it expedient and proper, again to call the attention of the General Assembly to the subject and urge the necessity of an appropriation for the purchase of a sufficient number of the back volumes of the Reports to supply the offices and courts and the exchanges designated by the law, and also to make proper provision for their purchase in the future.

STATE GEOLOGICAL COLLECTION.

The collection of the geological specimens accumulated under the provisions of the act organizing the Geological Survey of the State, remains in the same chaotic and unsatisfactory condition as when I called attention to the subject in my former report. I said then, and it will bear repeating, that the law placing this valuable collection under the special care of the Secretary of State having been repealed, it is now virtually without any custodian, and is now stored in one of the rooms of the State House. This collection, as before stated, is one of the largest and most complete that has perhaps ever been brought together in the prosecution of a survey of this kind, and I feel assured that by a judicious disposition of the duplicate specimens belonging to the survey, in exchange with other States and foreign countries, it could easily be made one of the largest and most complete geological museums in the United States.

No provision has yet been made for its preservation as a State cabinet, and no permanent place provided for its reception; the rooms originally set apart for it in the new State House having been subsequently assigned to the agricultural department, and no person has, been especially charged with the responsibility of taking care of it or with preparing and arranging the specimens for exhibition in a public museum. The State Geologist has virtually had the care of the collection to the present time, but as his duties and responsibilities ended with the publication of the sixth and final volume of his report, it seems important that some provision should be made for its care by Legislative authority, if the collection is to be retained as a State cabinet; if not to be so kept, to provide for its final disposal in some other way, so that the results accumulated with so much labor may not be entirely lost. Temporary quarters have been assigned the collection in the basement story of the new State House; but it only remains there on sufferance, and is liable to be removed whenever the room it now occupies may be required for some other purpose.

In order to carry into effect these recommendations, which are similar to those made in my report two years ago, a bill for the purpose was introduced and passed the lower branch of the 29th General Assembly, but did not pass the Senate, for the reason that the committee in charge of the same failed to report it back with their recommendation in time for its consideration before the final adjournment of the General Assembly. As this is a matter of some importance, I trust it will receive that attention from, and the consideration of, the members of the General Assembly about to convene that the subject deserves. The sixth and last volume of the Geological Report of the State has been published together with a large geological map, and the same has been distributed by me in accordance with the law on the subject.

DEFICIENCIES.

I have heretofore incidentally alluded to the fact that in order that the State contracts may be fully carried out by the Commissioners of State contracts, and that the incidental and necessary expenses incurred by the Secretary of State in the varied and responsible duties imposed upon him by law may be met, and to give him the power to carry out the wishes of the members of the General Assembly, to provide for their comfort and convenience, and to do such other things as he may by resolution be called upon to perform ; an act should be passed by the General Assembly as soon after it convenes as possible (with the emergency clause) to provide for the necessary expenses of the State Government and the General Assembly, incurred or to be incurred, and now unprovided for until the 30th day of June, 1877.

Whenever the proper committee of said General Assembly has such a bill under consideration, I will take pleasure in giving to the members thereof such information as they seek or should have to enable them to act intelligently upon such an important matter, and from the knowledge your Excellency has of the pressing needs of such an appropriation and of the neglect of the last General Assembly to provide for the same, although earnestly recommended by you, I feel assured that you will have no hesitation in calling the favorable attention of the General Assembly to this subject.

PERSONAL.

In submitting this, my second biennial report to your Excellency, I desire to avail myself of the opportunity to express my sincere thanks for the many official and personal courtesies extended to me during the past four years by your Excellency, during which time we have been so intimately associated ; and this association, both personal and official, will always be among the most pleasant memories of the past. Indeed, the relations that have existed between this office and all others of the Executive Department of the State, have always been harmonious and of the most pleasant and satisfactory character. In this connection I cannot neglect in justice to the faithful and efficient force of clerks employed in this office, to give to each the credit that is due for past services.

Robert P. Johnston, First Assistant Secretary, is one of the most efficient and valuable clerks in this office. To him is allotted responsible and laborious duties, requiring ability, judgment and discretion; all of which he has displayed, and all of his manifold duties he has performed with zeal, faithfulness and marked ability, and to my entire satisfaction, and has my hearty commendation.

J. N. Reece, Second Assistant and Book-keeper, has allotted to him duties of great responsibility in the work of the organization of corporations under the general laws of the State, also the keeping of the accounts of the General Assembly, and of the various appropriations and the expenditures of the same, which the law places wholly or partially under the control of the Secretary of State. He has performed his duties faithfully and well, and merits my hearty approval.

Albrecht Leiber has in charge the Executive record and other records of the State, the issuing of commissions and other documents, which are duties requiring experience, industry and ability,

all of which he possesses, as may be seen by reference to the records in his charge, which in my opinion reflect much credit on him.

Mrs. E. M. Boilvin, clerk in charge of the State Library, has performed all the duties required of her in a very satisfactory manner, and has proved herself admirably adapted for the position she so well fills. When not otherwise engaged she is employed as a copyist. Her earnestness and zeal in the performance of the work assigned her, has my hearty approval.

A. J. Ludlam is the shipping and receiving clerk, and has important and manifold duties to perform, all of which have been faithfully carried out. His years of service in this capacity have given him that experience so necessary to properly fill the position he occupies.

J. M. Adair, in charge of classifying, indexing and arranging the papers, bills and documents in the State Archives, has proved by the work that has been accomplished, to be the right man in the right place. The work is one of great magnitude, requiring care and skill in its performance, and so far as it has been done meets my hearty approval.

William I. Allen, a gentleman of long experience as a clerk, was engaged for some time as an assistant on this work, and performed his duties faithfully and well.

James K. Magie, the Printer Expert, (although as designated by law one of the Governor's appointees) is, by reason of his duties, in a great measure under my supervision. His duties require him to a certain extent, to have charge of the work performed by the contractor for State printing, read proof, estimate amount of work done by the contractor, etc. For nearly two years Mr. Magie has occupied this position and has made an efficient and industrious official, and I take pleasure in commending the manner in which this work has been done by him.

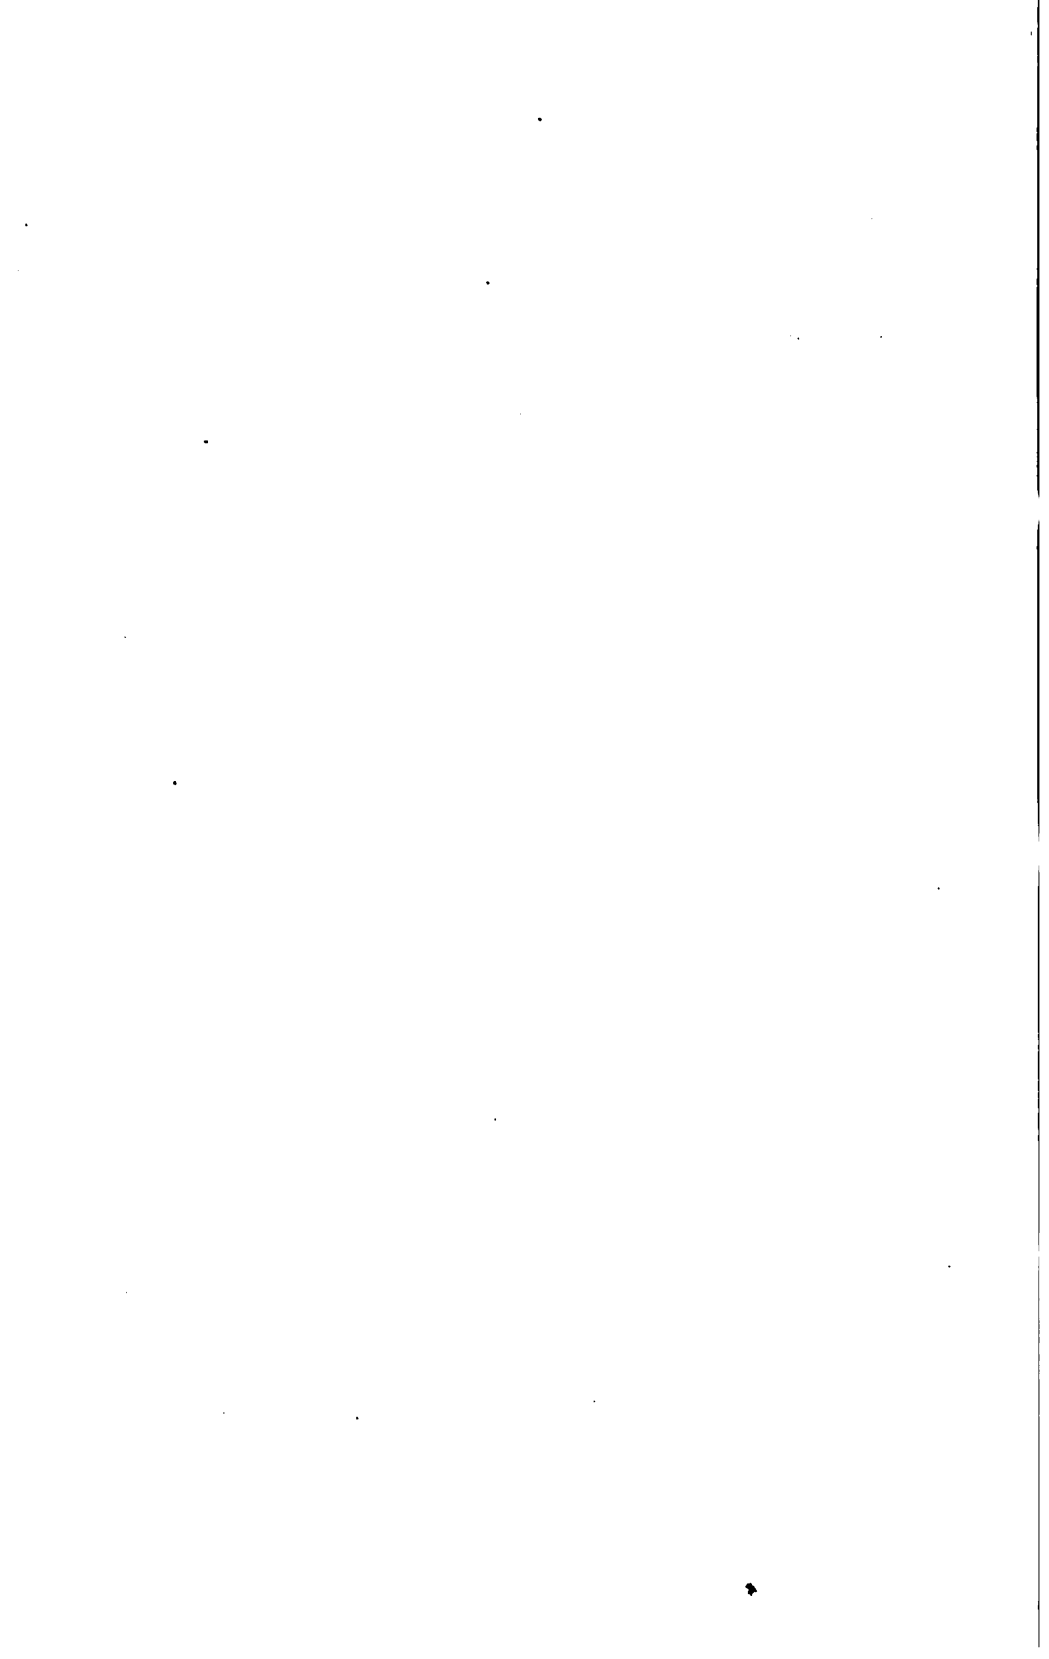

I have had occasion to employ other clerks in subordinate capacities, who, together with the other employes under my control, have proved themselves faithful, honest and industrious, in the several positions held by them.

CONCLUSION.

In this report to your Excellency, I have endeavored to give as full and complete an exhibit of the work of this office, as is contemplated by the provisions of the law requiring the same to be made, and have suggested such other matters as in my judgment may be of interest to yourself and the citizens of this great commonwealth.

All of which is respectfully submitted.

GEO. H. HARLOW,
Secretary of State.
